Dear Sir:

I read large parts of the findings of fact that were released many months ago by the previous judge in the case. Therefore, it was with total shock and dismay that I read the proposed settlement of the case last week. Once again, the justice department is giving Microsoft a slap on the wrist for their totally corrupt and harmful procedures in the business place.

I suggest that any justice department official be required to watch the sleazy testimony of Bill Gates before they are allowed to have any say in the settlement. A re-reading of the findings of fact would also be helpful. Microsoft is bound and determined to use any tactics, legal or otherwise to control every aspect of the market.

Where is the competition we have been taught in school that was the backbone of this nation? There is none if Microsoft is allowed to keep up their illegal actions.

How about some teeth in your proposal??

Dr. Bruce Rogovin
